

MISSION BRIEFING

MISSION

Retrieve the Briefcase full of money and get out.

There's just one problem: enemy agents with identical bomb-rigged cases have compromised your contact and now there's no telling which one holds the money. Find the money before time runs out and the rest of the cases explode!

EQUIPMENT

84 Action Cards

6 Agent Guides

6 Briefcases

1 Fuse Token (+1 spare)

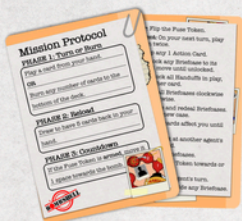

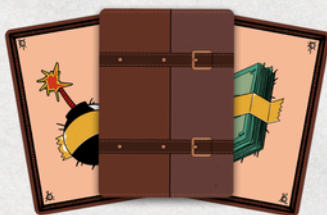

1 Bomb Timer

Action Cards

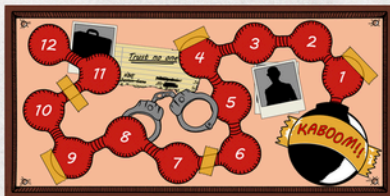

Briefcases

Agent Guides

Bomb Timer

MISSION PREP

1) BOMB TIMER

Place the bomb in the middle of the play area. This represents the number of turns left in the mission.

2) FUSE TOKEN

Set the token with the armed side (💣) face-up on the 12th space.

3) AGENT GUIDE

Give one to each agent for quick reference of both a turn's phases and action card abilities.

4) ACTION CARDS

Shuffle the deck and deal 5 to each agent to make up their hand. Set the rest of the deck to the side of the mat as the DRAW PILE.

5) PLAY PILE

Designate a spot as the PLAY PILE. This is where all cards go after being resolved.

6) BRIEFCASES

Shuffle one Briefcase for each agent, including the money, and pass them out face-down.

These stay face-down the entirety of the mission.

Do not look
inside your
case
...yet!

MISSION OVERVIEW

With the Briefcases staying face-down throughout the mission, agents take turns playing cards from their hand onto the PLAY PILE (unless the card says otherwise). Agents will need to use every trick in the book—bluffing, deduction, deception—and rely on their memory as the cases change hands and the bomb fuse moves down towards zero.

MISSION COMPLETE (How to Win)

When the **armed** Fuse Token reaches the bomb (zero) the mission is over and all agents must reveal their Briefcase.

The agent holding the case full of money is the winner, alive and the best agent we've ever seen!

RUNNING OUT OF CARDS

IF the DRAW PILE is exhausted before the mission ends, reshuffle the PLAY PILE and place it back onto the DRAW PILE area.

MISSION START

To begin, all agents look inside their Briefcase then place it back face-down. Play starts with the last person to drive a car or the last winner of Bombshell and continues clockwise.

Don't let anyone see!

NO MORE PEEKING

Only certain cards (p.5) will allow you to look inside any Briefcases for the remainder of the mission.

Until then...
EYES OFF!!

MISSION PROTOCOL

(During Your Turn)

PHASE 1: Turn or Burn

Play a card from your hand.

OR

Burn any number of cards from your hand to the bottom of the Draw Pile.

PHASE 2: Reload

Draw from the Draw Pile until you have 5 cards in your hand again.

PHASE 3: Countdown

If the Fuse Token is **armed**, move it down 1 space closer to the bomb.

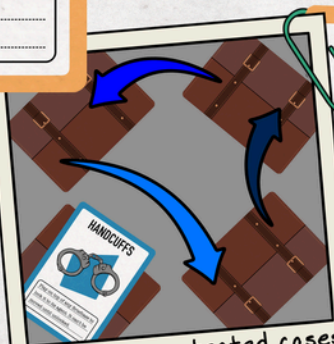

X-RAY GLASSES

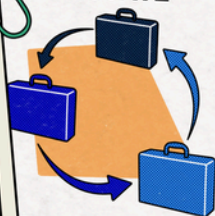

Look inside any Briefcase.

- You can look inside HANDCUFFED cases (p.6)
- You cannot look inside cases protected by SMOKESCREEN (p.6)

Locked or protected cases are skipped over during a ROTATE.

ROTATE

Rotate all Briefcases in the section you choose.

SWAP

Swap any 2 Briefcases.

5-6 Agents Rule

If the playing agent swaps their own case, they look inside their new case.

But only the playing agent can look!!

→ (p.6)
• Locked or protected cases don't get shuffled

• Briefcases cannot be looked in while being shuffled

SCRAMBLE

Shuffle all of the Briefcases, then redeal them. Agents who receive a new case look inside.

- Can only be unlocked by the JAILBREAK card (p.8)
- If an agent's Briefcase is locked, they can still play, but the SWAP, ROTATE, & SCRAMBLE cards (p.5) cannot move their case

HANDCUFFS

Play on top of any Briefcase to lock it to its agent. It can't be moved until unlocked.

SMOKESCREEN

Play this in front of you. No cards affect you or your Briefcase until your next turn.

In a scenario where you're a DOUBLE AGENT (p.8), and you play SMOKE SCREEN then a second card, the second card can still be stopped by a FREEZE!

- The Fuse Token does not get moved when passing the tranquilized agent since their whole turn is skipped
- TRANQUILIZER can be stopped by a FREEZE!
- Actively tranquilized agents cannot play a FREEZE!

Immunity

Agents build up a tolerance after being hit, and can only be Tranq'd once per mission!

(keep the card as a reminder after it wears off)

TRANQUILIZER

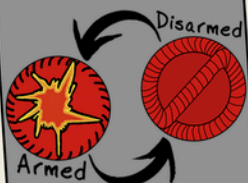

Play this in front of another agent to knock them out and skip their next turn.

• Another agent can play
DETONATOR to rearm
the Fuse Token before
it's your turn

DETONATOR

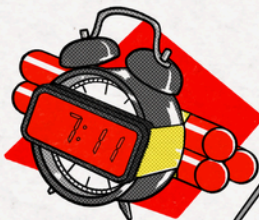

Flip the Fuse Token over. If
it's still disarmed by your
next turn, flip and rearm it.

TIP

Keep the DETONATOR card in
front of you as a reminder to
rearm the Fuse Token at the
beginning of your next turn.

TIMER

Move the Fuse Token:

★ +2 ○ +1

It does not move this turn.

TIMER moves the Fuse Token
closer or further from the
bomb, depending on its state.

2 spaces if it's armed ★

1 space if it's disarmed ○

TIMER can only move the Fuse
Token onto the bomb-ending
the mission if it's armed.

TIMER cannot move the Fuse
Token onto the bomb if it's
disarmed.

- The Fuse Token only moves 1 space at the end of your whole turn
- If **TIMER** is played as one of your cards, follow its rule for moving the Fuse Token at the end of your whole turn

DOUBLE AGENT

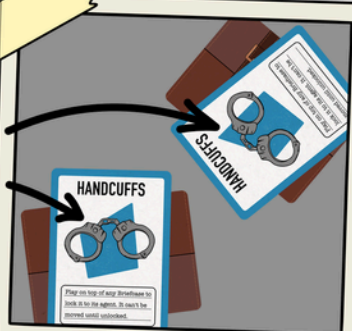

Play this in front of you. On your next turn, play or burn twice, or a combo of both.

JAILBREAK

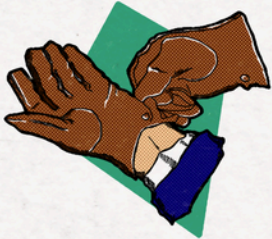

Unlock all **HANDCUFFS** that are in play, then play another card.

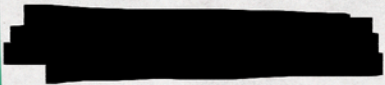

At least 1 **HANDCUFFS** card must be on top of a Briefcase to play this.

STICKY FINGERS

Look at any agent's hand and steal a card. You may play or keep the stolen card.

- No going back! Once you've seen the agent's hand, you must steal from them
- The target agent redraws to replace their stolen card

- Gotta be fast! If the other card's action has been completed, it's too late
- The Fuse Token still moves at the end of the turn if it's armed, regardless of the card that was stopped
- You can FREEZE! a FREEZE!
- Redraw to have 5 cards back in your hand after playing this
